## Programme

Please find below the provisional general program, list of authors' names ordered alphabetically by first name, together with the number of session and day in which authors speak, and finally the list of sessions with titles and session number.

Abstracts are available online in the **Abstracts**.

Together with the sessions proposed and approved the local organising committee has organised a set of sessions with the stand alone papers grouped according to themes and periods. We tried to accommodate all requests by participants both concerning sessions and dates.

Please bear in mind that **each session's slot corresponds to a 2h period**. Sessions usually include 6 speakers, at times including also a commentator. Having in mind the rationale behind STEP meetings, in which papers are pre-circulated, a brief 10 min summary of main points should be presented in order to give ample time for comments (when there is a commentator) and discussion. Please do not forget that pre-circulated papers should be received by 30 June.

Power point presentation and computer will be available in all lecture rooms.

**Please bear in mind that your abstract will only be included in the Book of Abstracts if your registration and payment has been completed by June 30.**

Please feel free to contact us if necessary

All the best,

On behalf of the local organising committee, *Ana Simões and Maria Paula Diogo*
